When Tech meets Medicine

**A unique destination to catch the next
wave of digital health transformation**

TAIWAN

Where innovations are shaping a new era of intelligent healthcare

- World-class medical centers and **advanced medical specialties**
- Most influential **IT, ICT & Electronics industry** in the world
- Best choice for **Medical AI, IoT, and Robotic** technologies
- High Quality pharmaceutical **R&D, CDMO, & CMO** capabilities
- Most comprehensive **health care database** and electronic clinical data

I. About Taiwan Healthcare⁺ Expo

Taiwan Healthcare+ Expo is the signature expo in Asia Pacific that provides solutions for medicine, health, and care. Starting from all aspects of healthcare needs, the expo strategically connects electronics, IT, biotech, pharmaceuticals, medical devices, precision machinery, precision medicine, and health management industries together. To demonstrate the latest breakthroughs and advances as well as spark new business opportunities across the health industry, the inaugural Taiwan Healthcare+ Expo debuted in 2017. Using “From Birth to Death” as the main theme, the expo gathered over 300 medical centers and companies spanning over 1050 booths to outline the blueprint of the entire health industry.

In this rapidly evolving era of health industry transformation, interdisciplinary alliances beyond boundaries will create endless opportunities for innovation and growth! This year, Taiwan Healthcare+ Expo will explore the health industry trend and focus on 3 central themes:

- **Efficient Healthcare**

The application of clinical big data, AI, and innovative medical devices to achieve high quality, precise, and efficient healthcare

- **Smart Healthcare**

The combination of mobile and IoT technologies, user-friendly assistive devices, and new care models to achieve smart healthcare

- **Innovative Healthcare**

The utilization of personal health management technologies and tools as well as novel pharmaceutical technologies and products to achieve preventive medicine and effective therapy

Centered around “Medicine X Technology” as the key driver, 2018 Taiwan Healthcare+ Expo will gather multi-national tech giants and showcase the latest medical advancements and applications of state of the art technologies to healthcare. We welcome all professionals from medical institutes, medical IT companies, medical device companies, pharmaceutical companies, biotech companies, and all health-related companies to come discover new business opportunities and collaborations with global health industry players.

III. Your One Stop Shop for Healthcare Solutions

◆ Exhibition Themes

• Medical Centers

- Advanced medical technologies and surgery solutions: liver transplant, advanced reconstructive surgery, in vitro fertilization (IVF), complex cardiac surgery, pediatric & neonatal specializations
- Nursing care services, hospital management, and health IT systems
- Medical fellowships & training

• Smart Healthcare

- Smart hospital solutions: smart ward, smart operation room
- Robots: surgical robots, rehabilitation robots, companion robots, surveillance robots
- Lab automation products

• Medical Devices

- Surgical navigation systems, CT scan machines, vital sign monitoring devices
- Implants, orthopedic/dental devices
- Hospital equipment, beds, supplies, and surgical tools
- Laboratory equipment

• Precision Medicine

- Genetic testing, screening, and disease risk assessments
- Biomarker-based diagnostics, reagents, and instruments
- Cell therapies, stem cell storage services, regenerative medicine, and related reagents/instruments

• Biotech & Pharmaceuticals

- Active pharmaceutical ingredients (APIs), CMOs, CROs, CDMOs
- New drugs, biologics, vaccines, and generics
- New drug development, testing, manufacturing equipment and pharmaceutical plant construction services

• Health Management Services (Long Term Care)

- Long-term care total solution
- Design & planning
- Assistive devices, mobility devices
- Visual/hearing/cognitive impairment devices
- IoT solutions

• Preventive Medicine

- Personal health management, health evaluation/promotion services, disease prevention supplies
- Health supplements, sports medicine, assistive technologies, training products

• Bio Agriculture

- Development of natural ingredients and cultivation and production of organic products
- Biodetection reagents, products, and services for plants, animals, and food safety
- Animal feed additives, drugs, and vaccines, and plant growth regulators

• Bio Innovations

- Innovative technologies from academic and research institutes and startups
- R&D services, collaborations, and incubator services
- Financial, intellectual property, commercialization, and regulatory consultation services and support

IV. Expo Events

◆ Forums on Innovative Medical Technologies

Following the great success of the 2017 Taiwan Healthcare+ Expo that effectively integrated the capabilities from medicine and technology through interdisciplinary collaborations, this year's expo will further explore the 3 main themes of "Efficient Healthcare," "Smart Healthcare," and "Innovative Healthcare." The organizers have invited AI pioneer IBM Watson Health, IoT tech giant, and medical experts to come together for discussions on cutting-edge technology trends, innovative applications, and market opportunities.

- Efficient Healthcare – Applications of big data, precision medicine, and AI in healthcare
- Smart Healthcare – New values in IoT healthcare solutions
- Innovative Healthcare – Microbiota, human metabolism, and immunotherapy

◆ Medical Conferences

In 2018, we will co-organize meetings with Association for Dental Sciences of the Republic of China, Taiwan Medical Association, Taiwan Union of Nurses Association, TAPO, Taiwan Society of Internal Medicine, Taiwan Surgical Association, Taiwan Otolaryngological Society, Taiwan Association of Family Medicine, Taiwan Hypertension Society, Taiwan Academy of Physical Medicine and Rehabilitation, Taiwan Society of Plastic Surgery, and Formosan Medical Association to discuss updates on the latest clinical developmental trends and needs. Don't miss this opportunity to interact with medical experts and healthcare providers.

◆ Innovative Technology Workshops

The Innovative Technology Workshop series provides a global stage for exhibitors to showcase the latest technologies, products, and services. Receive immediate feedback from clinical experts and healthcare providers, and unlock opportunities for collaborations.

◆ 2nd Annual BioMed Innovation and Investment Conference

This conference gathers biomedical entrepreneurs, investors, and business professionals from Taiwan, Mainland China, Hong Kong, and Macau all in one place. This is your best gateway to familiarize yourself with strategies to enter the Greater China market and discover new business opportunities.

Seminars led by the expo's top medical teams on critical health issues. Key opinion leaders will present the latest findings, preventive measures, treatment options, and patient care models. Co-organize or sponsor a health seminar on a health topic of interest with the expo's medical teams to engage in insightful discussions!

V. 2017 Expo Recap

◆ The inaugural Taiwan Healthcare+ Expo showcasing the entire health industry attracts government support!
