## 2018 TIFSS for New, Far-Reaching Opportunities

The **Taiwan International Fisheries & Seafood Show (TIFSS)**, Taiwan's exclusive, professional and vast B2B fishery show, leverages Taiwan's outstanding export/import strengths and attracts nearly **200 exhibitors from over 20 countries**. These exhibitors will showcase their latest achievements and high-caliber products and services.

Offering boundless fishery opportunities from under the sea to on the table, the show connects every up- to down-stream facet of the fishery industry. An estimated **7,000+ buyers from nearly 60 countries** and 200 exhibitors will set a record number of ground transactions.

### Fishery Equipment & Technology

With over 2,000 vessels fishing on the high seas and in the EEZs of 30+ countries across the Pacific and Indian Oceans, and accounting for more than one-third of the global longline tuna fleet, Taiwan is truly a major player in the global seafood industry.

Boasting around 12,400 motor fishing vessels (as of 2017), Taiwan has an **extensive shipbuilding industry comprising advanced comprehensive fishery equipment and technology to meet client needs**. These include: high-C/P products such as propellers, rudders, hardware parts, deck machinery, outfitting facilities, fishing gear, rugged marine-grade IT products, fish aggregating devices, and fish detection equipment.

### Aquaculture Techniques

Over 50 years' breeding experience has made Taiwan a global leader in aquaculture. With major breeds including grouper, tilapia, milkfish, hard clam, and cobia, Taiwan is ranked 18th in "FAO's World Aquaculture Production by Principal Producers" in terms of quantity with its major export countries including China, Hong Kong, Japan, USA, and Singapore. **Taiwan's cutting-edge and eco-friendly breeding techniques** such as fish pond management, freshwater circular systems, and automatic monitoring devices, **have driven the world to TIFSS in seeking cooperation**.

Aquaculture's ongoing growth makes Taiwan's fishery sectors such as aquatic artificial feeds/additives, prevention/cure of aquatic disease, and fishery medicine, both appealing and prosperous.

### 2017 Export Value of Taiwan Fishery by Product

Edible Product	Value	Nonedible Product	Value
Total	1,766,900	Total	36,531
Live	155,320	Spawn, Fertile	2,048
Fresh or Chilled	135,251	Fry	2,959
Frozen	1,371,848	Live	4,957
Dried	16,671	Meal	1,063
Salted or in Brine	3,892	For Feed	14,942
Smoked	761	Other Nonedible	10,563
Prepared, Preserved	66,751		
Canned	12,123		
Gel	1,001		
Extracts & Juice	2,430		
Oil	356		
Other Edible	407

### Taiwan's Promising Market

Taiwanese love seafood – Taiwan's per capita fish and seafood consumption reached 23.81 kg in 2016, higher than the global average consumption of 20.5 kg. Taiwan's import/export fishery products have enjoyed steady growth on an annual basis. **The Taiwan seafood market's unceasing, rising demand has driven global buyers/exhibitors to explore partnerships with the local industry.** TIFSS offers the most efficient platform to facilitate their cooperation.
